

**PIG  
RESEARCH  
SUMMIT**

**2027**

Crowne Plaza Copenhagen Towers, Denmark

## **SOW LONGEVITY THE KEY TO SUSTAINABLE PRODUCTION**

# Join us in Copenhagen on 10-11 February

### **Crack the code for sow longevity**

High sow mortality remains one of the most critical challenges in global pig production. It affects welfare, productivity, sustainability and economic resilience.

Pig Research Summit 2027 puts sow longevity at the centre — bringing together science, practice and cross-disciplinary expertise to advance more sustainable and future-ready pig production.

#### **Key takeaways**

- A holistic understanding of the factors that truly drive sow longevity
- The latest research – translated into practical application
- Inspiration for concrete actions in advisory practices, development, and production
- A strong, cross disciplinary network
- Clear direction for working strategically with sow longevity in future pig production.

### **Take the spotlight – submit your abstract!**

Gain the opportunity to showcase your practical experience or research to leading industry experts from around the world.

Abstracts should address one of the following topics:

- Understanding sow mortality
- Improving the next generation of sows
- Improving sow survival
- Managing sow health around farrowing
- Improving lactation and piglet life in pig production

↓  
**SUBMIT  
ABSTRACT  
BY 26 AUG**

If your abstract is accepted, you may have the opportunity to present your work either in writing or as an oral presentation. Deadline is 26 August 2026. I hope to see you at the Pig Research Summit.

Best regards,

Christian Fink Hansen  
President, Pig Research Summit  
Director, PhD Animal Science, Danish Agriculture & Food Council

# PIG RESEARCH SUMMIT

2024

Copenhagen 20-21 November 2024  
at Hotel Crowne Plaza Copenhagen, Denmark

**SUSTAINABLE**  
PIG FEED FOR  
THE FUTURE

**INVITATION**

## Join Pig Research Summit 2024

### We are pleased to invite you to the International Pig Research Summit 2024

This summit aims to bring together value chain leaders, researchers, and decision-makers to advance the development of sustainable and resilient food production practices for pig farming while accelerating innovation across the industry.

The Summit provides an opportunity to gain cutting-edge knowledge on sustainable feed practices and technologies in the global pig industry. Beyond insights, the event serves as a unique networking platform, fostering partnerships and encouraging open dialogue to drive positive change towards a more sustainable future in pig farming.

### Research abstracts are welcome

If you are conducting research related to one of the six main topics, please submit an abstract outlining your findings and results.

### Abstracts should address one of the following topics:

- TOPIC 1: Cultivation of sustainable feed for pig production
- TOPIC 2: What are the sustainable pig feed protein sources in the future?
- TOPIC 3: Improved nutrient utilisation in pig feed
- TOPIC 4: Inventory methods and documentation
- TOPIC 5: How to balance sustainability and competitiveness in pig production

If your submission is successful, you will have the opportunity to share your work with global industry experts.

We are looking forward to seeing you in November 2024.

Best regards,

Christian Fink Hansen
